Butler University  
Equipment Fund Guidelines

The Equipment Fund (EF) was established through the generous support of the Lilly Endowment. The Fund serves the need for new or updated equipment for research programs and is administered by the Institute for Research and Scholarship (BIRS). All equipment requests are reviewed and approved by the deans of the colleges and library sitting as the Equipment Review Committee.

BIRS is the primary interface within the University for the allocation of EF funds. The following information is provided to assist colleges in preparing a request to purchase EF-funded equipment.

Goals of the EF
Allocations may be used to purchase technology and equipment for the following:

- Research activities that are separately budgeted and organized into approved departmental budgets. EF purchases must be matched 50% by the department or college.

- Activities for research grants and contracts and other programs sponsored by agencies external to the University and which are totally funded by such external sources. EF purchases for external research must be matched 50% by the sponsored project the EF is supplementing.

EF Stipulations
There are specific restrictions that pertain to equipment purchased under EF. To qualify, purchased equipment must meet all of the following requirements:

- Allocations must be used to purchase technology and equipment for the following programs: Departmental research and sponsored program research.

- The equipment must have a minimum unit cost of $500.

- The equipment must have a useful life of three or more years.

- The equipment must be maintained in good working condition.

EF owned equipment is subject to periodic on-site audits by BIRS to verify the equipment’s condition, location, and use.

The following purchases are not qualified equipment.

- Library books, films, videotapes, DVD’s, and library materials.
- Microfilm collections and materials.
• Computer hardware and software will be supported only if they are essential to the unique requirements of the research project.
• Office equipment, blinds, carpets, file cabinets, desks, chairs and tables.
• Transportation equipment (automobiles).
• General telecommunications equipment.
• Equipment affixed to a building or functional as part of an operating system of a building.
• Climate control and security systems.
• Buildings.
• General applications software (Excel, Word, etc).
• Used equipment.

Functional Unit
To be eligible for EF funding, individual equipment items must cost $500 or more, except when the item is part of a functional unit. A functional unit is defined as an assemblage of EF instruments, modules and components that collectively perform a specific task and remain assembled as a unit. In the case of items that compose a functional unit, the individual components may cost less than $500, but the aggregate cost of the functional unit must be $500 or more. Examples of functional units include (1) a computer (if allowed), keyboard, monitor, printer and operating software, (2) oscilloscope with probes and (3) recording spectrophotometer with demountable cell assembly and windows. Items merely aggregated so the group costs more than $500 are not a functional unit. For example, an order for 10 external disk drives costing $300 each would not constitute a functional unit. EF stipulations provide that EF tagged equipment must maintain its original integrity as a functional unit. Components of EF functional units must not be interchanged with other units.

Upgrading Equipment
Upgrades (not maintenance or general upkeep of equipment) may be permissible using EF funds for non-EF equipment. The upgrade and equipment to be upgraded must meet the EF requirements. The circumstances of the upgrade will be subject to review by the Equipment Review Committee and may require the entire piece of equipment to be tagged as EF equipment.

Equipment Request Form
The BIRS will distribute a memo outlining each respective college’s allocation. The EF Request Form is available on the BIRS website at: www.butler.edu/birs. Information to be provided on the form includes:

Quantity – How many of each item

Model#

Description – Please keep this general.
**College Priority** - Priority numbers are assigned by the dean of each college to evaluate the overall relative importance of equipment requests. The dean must assign a priority number to each item of equipment for which EF funding is being requested. Priority numbers should begin with the top priority assigned number one followed by items of lower priority being numbered consecutively. When several items of equipment comprise a functional unit, all of the items that comprise the functional unit should be assigned the same priority number. **Each separate functional unit should be assigned a separate priority number.** That is, every item on request list should not be assigned a priority number of 1.

**Unit Price**

**Match (Required)** - If the equipment is for departmental research, a 50% match from the department or college is required. If the equipment is for sponsored programs, the sponsored project the EF is supplementing must cover 50% of the funding.

**Total EF Request** = Total cost minus match.

Colleges are asked to critically assess their equipment needs to determine items for inclusion.

**Appeals Process** – The Equipment Committee’s approvals, actions and recommendations are subject to review by, and appeal to, the Provost.

If you have questions about these guidelines, please contact the Provost’s Office at provost@butler.edu.
